✉ Resumen i Cabeceras

Hello,

Yes, the package is marked with the name of the person who must receive the package and in this type of shipments it is specified that the named person must be the one who receives the merchandise. Otherwise the delivery person would not be doing the job well, since this aspect is what was agreed upon with the transport company.

It would be possible to schedule a delivery at a collection point if you are not going to be at home; This could be done once the tracking number is received from the transport company's website.

I hope I have helped you with your query.

Best regards,

Alberto M

Does the person who receives the delivery have to be the same person on the ID or not?
