Detailed Notes

End of last year concerned to Axel behaviour in lessons, dad thought ASD had meeting with SENCO no signs. Hoping for improvement in year 9, was multiple teachers raising concerns was quite often Axel's reaction to detentions that was concerning. Friday 20 September, was issue Axel punched another student, he was tapping in on head, so punched him in face. This was then raised about **DPA** being involved and tormenting Axel. School monitored all off this to keep boys apart and monitor situation was no more reports. When **DPA** was spoken to in relation to the incident he made it out to be Axel annoying them first. Others involved were happy to have mediation between them all but Axel did not want that. Axel's reactions seem to be out of proportion, he was tapped on the head so punched another pupil. When asked why he brought in the knife, very calm saying he would stab him, no remorse, was not to scare him off, and said it was to stab him. He was fed up of **DPA** pushing him around, School feel this is out of proportion, no threats to life were made to Axel or family and Axel stated he was ready to stab **DPA**. About week before Knife, Axel said to a teacher this is why teachers get murdered after reciving a detention for talking. Axel said him and a friend had been talking about this before that's why he said it. CAMHS referral general concerns for axels reactions and rationalisation no mention of any SEN concerns.
