NCmec Reports Definition

NCmec Cybertips: NCMEC cybertip reports associated with the account holder.

CyberTip ID: Unique system-generated identifier associated with the cybertip.

Time: Date and timestamp the NCMEC cybertip was sent.

Responsible Id: Identification number of the sender's Instagram account associated with the NCMEC cybertip report.

Details: Text and/or media associated with the cybertip.

Text and/or Media ID: The unique system-generated ID associated with the content.

Upload Time: Date and timestamp the account holder uploaded the content.

User Generated Filename: Name of the media file when the account holder uploaded the media to the platform.

Upload IP: IP address captured at the time the account holder uploaded the media.

NCMEC File ID: File ID provided by NCMEC associated with the cybertip.

Human Reviewed: If the content was manually reviewed.

Yes: Content in the file were viewed by an employee or contractor at Meta concurrently with or immediately before the file was submitted to NCMEC.

No: Historically at least one employee or contractor at Meta viewed a file whose hash matched the hash of the reported content and determined it contained apparent child pornography.

Recipients: The account holder that received the content.

Media: The bytes associated with the uploaded media.

PhotoDNA Hash: The unique system-generated ID signature/hash of the uploaded media.

Caption: Caption posted with the media.

Sharepoint: Sharepoint is the location where the content was shared within the platform.

☐ **All**
Metadata: Metadata associated with media

☐ **Re**
Messages: Up to 3 messages above and below the reported content.

☐ **Para**
Reported Text (alternative to Media associated with cybertip): Text only content that has been reported associated with the cybertip

☐ **NC**
Industry CSAM Classification: The industry CSAM classification media depictions.

☐ **Na**
NCMEC Defined Product Annotations: File depiction annotation associated with the

Photos Definition

Photos: Information about the photos uploaded to the account.
ID: Unique system-generated Identifier of the image.
Taken: Date and timestamp the image was uploaded.
Status: Status is whether the image can be viewed.
URL: Link to the photo.
Source: Refers to the device through which the photo was taken.
Filter: Displays the filter used on the image.
Is Published: Indicates if the image is currently on the profile.
Shared to Platform: Indicates if the photo was shared to a different platform (true) or only posted to IG (false).
Carousel ID: The unique system-generated ID that is created when a post contains more than one media.

Meta Platforms Business Record Page 7

Upload IP: IP address and source port/port numbers associated with the uploaded image. Source port/ port numbers are provided when available. If available, it is located at the end of the IP address, after the colon.
Owner: Owner of the account.
Author: The authorized account holder who uploaded the photo.
Comments: Comments associated with the photo.

Owner: The account that shared the comment.
Author: The authorized account holder that posted the comment.
ID: Unique system-generated identifier for the comment.
Date Created: Date and timestamp of when the comment was posted.
Status: Indicated if the image can be viewed.
Text: User generated text.

Photos

No responsive records

Comments Definition

Comments: Displays comments left by the account holder on their own or other users' images/videos.
ID: Unique system-generated identifier associated with the comment.
Media Content ID: Unique identifier associated with the media.
Media Owner: The account owner of the content that was commented on.
Date Created: Date and timestamp of when the comment was published.
Status: Indicates the status of the comment.
Text: Text associated with the comment.
Owner: Owner of the account.
Author: The authorized account holder who made the comment.

Meta Platforms Business Record Page 8

Privacy Setting: Displays current privacy settings for content.
Public: The privacy setting of the content is Public.
Private: The privacy setting of the content is Private.
Close Friends: The privacy setting of the content is only viewable to Close Friends.

Unified Messages Definition

Unified Messages: Private communication between account holders.

Thread: Unique system-generated identifier associated with conversation thread.

Current Participants: Account holders included in conversation thread.

Owner: Owner of the account.

Author: The authorized account holder that sent the message on behalf of the owner.

Sent: Date and timestamp of communication sent.

Removed by Sender: Indicates that the communication has been removed by the account holder who sent the message.

Call Record: Indicates a call was made through a conversation thread.

Type: Indicates the method in which a call was placed.

Missed: Indicates if the call was missed.

Duration: Length of the call (in seconds).

Thread Name: Name given to the chat thread by the group admin.

Encrypted Calls: Calls that were encrypted.

Meta Platforms Business Record Page 12

Attachment: Files associated with the communication.

Type: Description of what type of attachment.

Size: The size of the file sent.

URL: URL of the content.

Body: Text of communication, or description of content type sent.

Past Participants: Lists the account holders that have previously been subscribed to the conversation thread.

Subscription Event: Indicates an update to a participant's subscription to the conversation thread.

Type: Indicates action associated with the participant.

Users: the account holders impacted by the subscription update.

Share: Items shared into the communication thread between account holders.

Date Created: Date and timestamp associated with the share.

Text: Content of the share.

URL: URL of the content.

AI: AI represents threads that include messages generated by Generative AI

True= AI content is included in the message thread.

False= AI content is not included in the message thread.

AI Searches: Searches made by the account holder that generate AI stickers within a chat.

Read Receipts: A user-enabled setting that indicates whether the account holder's read receipts will be automatically displayed to other users.

Enabled: The thread level setting for when read receipts are turned on. This is the default setting.

Disabled: The thread level setting for when read receipts are turned off.

Facebook retains the author, but NOT the recipient(s), of individual messages for Messenger threads. Facebook also retains the following information for Messenger threads:

- (1) Current Thread Participants – a list of all accounts subscribed to a thread at the time Facebook retrieved the records;
- (2) Past Thread Participants – a list of all accounts previously (but not currently) subscribed to a thread at any time before the records were retrieved; and
- (3) Subscription Event – a log of an account subscribing to (joining) or unsubscribing from (leaving) a thread during the date range covered by the production. *Subscription events that fall outside of the date range covered by the production are not included.*

Likes Definition

Likes: Media the account holder liked.

ID: Unique system-generated identifier of the action.

Taken: Date and timestamp of when the media was uploaded to IG.

Status: The current status of the media on the account.

Liked Post Owner Vanity: Username of the post owner that the account holder liked.

Like Timestamp: Date and timestamp the account holder liked the post.

URL: The link to the media.

Source: Where the media is uploaded from.

Filter: The filter used on the media.

Is Published: Indicates if the media is currently on the profile.

Shared to Platform: Indicates if the media was shared to a different platform (true) or only posted to IG (false).

Upload IP: IP address captured at the time when the liked post is uploaded.

Meta Platforms Business Record Page 15

Cross Post ID: The unique system-generated ID of the media that has been shared from Instagram to Facebook.

Owner: Owner of the account.

Author: The authorized account holder who liked the media.

Comment Likes Definition

Comment Likes displays the comment liked by the account holder

Like timestamp: date and timestamp the account holder liked the comment

Comment Author Vanity: Account holder that made the comment

Post URL of Comment liked: URL of the comment liked

Comment Likes

No responsive records

Linked Accounts Definition

Linked Accounts: Lists the name and identity of any accounts linked to the Instagram account.

Meta Platforms Business Record Page 162

Service: The linked platform name.

Identifier: The linked account identifier.

Linked Accounts

No responsive records

Reported Conversations Definition

Reported Conversations: Private messages reported to Meta.

Reported Conversation ID: Unique system-generated identifier associated with the conversation thread.

Participants: Account holders participating in the conversation.

Reporter: Account holder who reported the content.

Time Reported: Date and timestamp the conversation was reported.

Sender: Account holder or authorized account holder who sent the messages.

Owner: Owner of the account.

Sent: Date and time message was sent.

Message: Body of message.

Attachments: Attachments associated with the reported content.

Type: Type of attachment.

URL: Link associated with attachment.

Photo ID: Unique system-generated identifier associated with image.

Reported Conversations

No responsive records

Reported Disappearing Messages Definition

Reported Disappearing Messages: Private disappearing messages reported to Meta.

Participants: Account holders participating in the disappearing messages conversation.

Reporter: Account holder who reported the disappearing message(s).

Time Reported: Date and timestamp the conversation was reported.

Meta Platforms Business Record Page 163

Disappearing Messages Thread ID: Unique system-generated identifier of the thread with set duration.

Sender: Account holder or authorized account holder who sent the disappearing messages.

Owner: Owner of the account.

Sent: Date and timestamp the reported disappearing messages were sent.

Message: Body of the reported disappearing messages.

Attachments: Attachments associated with the reported disappearing message(s).

Type: Type of attachment.

URL: Link associated with attachment.

Photo ID: Unique system-generated identifier associated with the image.

Reported Disappearing Messages

No responsive records

Encrypted Connection Info: Encrypted Connection Information (device) provides information on the device that the account holder used to access e2ee features and could also include other actions such as opening the app from a non-running state, receiving push notifications to a mobile device, or sharing messages via iOS share sheet and Android chat bubble.

Current Connected IP: Current IP address associated with the account holder.

Current Connected Port: Current port associated with the account holder.

Last Active Time: Date and timestamp account holder was last online.

Last Connected IP: Last connected IP address associated with the account holder.

Online Since: Date and timestamp the account holder was online.

Encrypted Connection Info

No responsive records

Threads Following Definition

Threads Following:

Following: Threads Accounts that the account holder is following at the time of data production.

Timestamp: The date and timestamp when the account holder followed other Threads accounts.

Threads Following

No responsive records

Threads Followers Definition

Meta Platforms Business Record Page 164

Threads Followers:

Follower: Threads accounts that follow the account holder at the time of data production.

Timestamp: The date and timestamp when Threads accounts followed the account holder.

Threads Followers

No responsive records

Threads Liked Posts Definition

Threads Liked Posts:

Timestamp: The date and timestamp the account holder liked a Threads post.

Post Author Vanity: Author of the Threads Post.

Post URL of Like Post: URL link of the Threads Post.

Threads Liked Posts

No responsive records

Threads Registration Date Definition

Threads Registration Date: The date and timestamp when the account holder registered an account on the Threads App.

Threads Registration Date

Unknown

Threads Posts And Replies Definition

Threads Posts and Replies: Posts and replies the account holder made in the Threads App.

Post Author ID: The unique system-generated ID of the author who created a Threads post or reply.

Post Content ID: The unique system-generated ID of the Threads post or reply content.

Timestamp: Date and timestamp of when the author made the Threads post or reply.

Post Setting: Setting of who can reply to the Threads post or reply. (Anyone, Profiles you follow, Mentioned only)

Reply to Author: The unique system-generated author ID for the Threads post or reply that the account holder replied to.

Reply to (Post) ID: The unique system-generated ID of the Threads post or reply that the account holder replied to.

Quoting Post Author: The unique system-generated author ID for the Threads post or reply

that the account holder quoted.

Quoting ID: The unique system-generated ID for the Threads post or reply that the account holder quoted.

Meta Platforms Business Record Page 165

Reposting Author ID: The unique system-generated author ID for the Threads post or reply that the account holder reposted.

Reposting ID: The unique system-generated ID for the Threads post or reply that the account holder reposted.

Text: Text associated with the Threads post or reply.
