Overall Summary

Overall Summary of progress achieved, reasons for successful outcomes or for non or partial achievement of planned outcomes	TM is in agreement that a referral is needed [DPA] to transitions but also for Axel as referrals can be made 13+. I have considered the social workers request for SM oversight for direct payments but actually believe this need can be met without DP. I am aware that Axel has had a review of his EHCP plan which has identified a school who supports children with additional needs is appropriate and a provision is being sought. He currently attends a PRU provision which isn't appropriate for his needs and only attends an hours a day ., therefore it is my view that his social isolation is only present by virtue of not having the appropriate provision in place during the educational day. Therefore education should be providing more for this young male to meet his needs both on an educational and social basis until appropriate provision is sourced as identified in his EHCP. The case can step down to early help, however i think i meeting needs to be held as part of this step down to highlight the concerns and unmet needs due to his lack of appropriate provision and a play of how to change this. EH can offer support for Axel to also access Lancashire breaktime outside term time and out of school hours. If at the point all of his other needs are met as identified and there is still a need for additional support that falls within CSC remit then this can be reconsidered. Case disucssion held with CFW on 27.9.21 who agreed to take the case
