Enabled: The thread level setting for when read receipts are turned on. This is the default setting.

Disabled: The thread level setting for when read receipts are turned off.

Messages

No responsive records

Facebook retains the author, but NOT the recipient(s), of individual messages for Messenger threads. Facebook also retains the following information for Messenger threads:

(1) Current Thread Participants – a list of all accounts subscribed to a thread at the time

Facebook retrieved the records;

(2) Past Thread Participants – a list of all accounts previously (but not currently) subscribed to a thread at any time before the records were retrieved; and

(3) Subscription Event – a log of an account subscribing to (joining) or unsubscribing from (leaving) a thread during the date range covered by the production. *Subscription events that fall outside of the date range covered by the production are not included.*

Likes Definition

Likes: Media the account holder liked.

ID: Unique system-generated identifier of the action.

Taken: Date and timestamp of when the media was uploaded to IG.

Status: The current status of the media on the account.

Meta Platforms Business Record Page 10

Liked Post Owner Vanity: Username of the post owner that the account holder liked.

Like Timestamp: Date and timestamp the account holder liked the post.

URL: The link to the media.

Source: Where the media is uploaded from.

Filter: The filter used on the media.

Is Published: Indicates if the media is currently on the profile.

Shared to Platform: Indicates if the media was shared to a different platform (true) or only posted to IG (false).

Upload IP: IP address captured at the time when the liked post is uploaded.

Cross Post ID: The unique system-generated ID of the media that has been shared from Instagram to Facebook.

Owner: Owner of the account.

Author: The authorized account holder who liked the media.
